FARM PRODUCTION, DISPOSITION, CASH RECEIPTS AND GROSS INCOME FOR TURKEYS
1950 - 51 1/

Turkey production in 1951 totaled 52,013,000 birds, the Bureau of Agricultural Economics reports. This is 19 percent more than in 1950. Production was above that of 1950 in 43 States, the same in 3 States and below in 2 States.

California was again the leading State in the production of turkeys, with 9,471,000 birds in 1951, followed by Minnesota with 4,632,000, Virginia with 3,658,000, Texas with 3,187,000 and Iowa with 3,094,000. These 5 States accounted for about 46 percent of the turkeys produced in 1951. The Western States, the largest producing area in the United States, produced 32 percent of the Nation's turkeys in 1951, the West North Central 23 percent, the South Atlantic 15 percent, the East North Central 12 percent, the South Central 10 percent and the North Atlantic 8 percent.

Beltsville White Turkeys Increase: Beltsville White turkeys for fryer production have been increasing rapidly during the last 2 years to meet a year-round demand for young turkeys 14-17 weeks old weighing 4-8 pounds dressed. Most of the increased production of Beltsville Whites have been sold at 4-8 pounds dressed as young roasters and fryers and the balance, part of the early spring hatch, have been raised to 6 or 7 months old for the holiday trade.

Turkey producers reported on January 1 the number of Beltsville White turkeys raised in 1951. These reports show that about 20 percent of all the turkeys raised in 1951 were Beltsville Whites. The increase in Beltsville Whites between 1950 and 1951 appears to be responsible for about 2/3 of the increase in the total turkey crop last year.

Turkey Sales Larger: Turkeys sold in 1951 numbered 50,625,000 birds -- 18 percent more than in 1950. Sales exceeded those of 1950 in all areas of the country. However, pounds of turkey sold in 1951 exceeded sales in 1950 by only 14 percent because of the large increase of Beltsville White turkey fryers that were sold at much lighter weights than other turkeys.

January 1 Breeder Hen Holdings Larger: Breeder hen holdings on January 1, 1952 were 16 percent larger than a year earlier and all other turkey holdings (market birds and breeder toms) were 12 percent larger.

Prices Higher: The average price received for turkeys sold in 1951 was 37.4 cents per pound live weight, compared with 32.8 cents in 1950. Prices in 1951 were above those of 1950 in all months of the year and in December 1951 the price was 15 percent higher than a year earlier.

Cash Receipts Larger: Cash receipts from the sale of 907,696,000 pounds (live weight) of turkey meat in 1951 reached a new high record of \$339,490,000. This was 30 percent more than in 1950, largely reflecting the larger turkey crop in 1951.

Market Turkeys Lighter: Market turkeys averaged 17.9 pounds live weight in 1951 -- seven tenths of a pound lighter than in 1950 because of the increased proportion of Beltsville White turkeys raised in 1951 and sold as fryers at lighter weights. Hens averaged 13.6 pounds in 1951 compared with 14.1 in 1950 and toms 22.2 compared with 23.0 in 1950.

Death Loss: Loss of poultts in 1951 was 12.9 percent of those hatched compared with 15.6 percent in 1950. Breeder hen losses were 7.5 percent compared with 7.9 percent in 1950.
